## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/IB2002/001384

## Box No. I Basis of the report

1. With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.

This report is based on a translation from the original language into the following language \_\_\_\_\_, which is the language of a translation furnished for the purposes of:

international search (under Rules 12.3 and 23.1(b))  
 publication of the international application (under Rule 12.4)  
 international preliminary examination (under Rules 55.2 and/or 55.3)

2. With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):

the international application as originally filed/furnished

the description:

pages 1 - 14 as originally filed/furnished

pages\* \_\_\_\_\_ received by this Authority on \_\_\_\_\_

pages\* \_\_\_\_\_ received by this Authority on \_\_\_\_\_

the claims:

pages \_\_\_\_\_ as originally filed/furnished

pages\* \_\_\_\_\_ as amended (together with any statement) under Article 19

pages\* 1 - 8 received by this Authority on 2004.04.15

pages\* \_\_\_\_\_ received by this Authority on \_\_\_\_\_

the drawings:

pages 1 - 2 as originally filed/furnished

pages\* \_\_\_\_\_ received by this Authority on \_\_\_\_\_

pages\* \_\_\_\_\_ received by this Authority on \_\_\_\_\_

a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.

3.  The amendments have resulted in the cancellation of:

the description, pages \_\_\_\_\_  
 the claims, Nos. \_\_\_\_\_  
 the drawings, sheets/figs \_\_\_\_\_  
 the sequence listing (specify): \_\_\_\_\_  
 any table(s) related to the sequence listing (specify): \_\_\_\_\_

4.  This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).

the description, pages \_\_\_\_\_  
 the claims, Nos. \_\_\_\_\_  
 the drawings, sheets/figs \_\_\_\_\_  
 the sequence listing (specify): \_\_\_\_\_  
 any table(s) related to the sequence listing (specify): \_\_\_\_\_

\* If item 4 applies, some or all of those sheets may be marked "superseded."

The claimed invention relates to the method and network system for charging an account related to a terminal device of a subscriber to a first data network session rendered to the terminal device when roaming in a second data network. The claimed invention solves the problem of complicated online charging of roaming network subscribers.

D1 is considered the closest prior art and relates to a method of routing Call Detail Records (CDRs) for a subscriber from a foreign network to a home network whilst the subscriber is roaming in the foreign network. D1 solves the problem of charging when it is too complicated and takes too long before the CDRs are forwarded on to the home network. D1 solves the problem by routing CDRs for a subscriber from a serving exchange (a mobile switching centre, MSC) to a billing system.

The invention according to D1 include the following steps:  
 -registers the terminal device (the mobile subscriber) with the second network (the foreign network, see paragraph 0006 in D1);

.../...

## Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

Continuation of: Box V

- transmits a network address of a charging system related to said first network from the first network to the second network (a billing system address is coupled to the first network, paragraph 0008);
- establishes a network session for the terminal device by the second data network;
- assesses in the second data network first charge information about the network session (see paragraph 009);
- transmits assessed charge information from the second data network to the network address of the first charging system (it transfers info of CDRs to the billing system address, see paragraph 0010);
- calculates a charge for the network session at the first charging system using incoming first charge information (see paragraph 0037).

The cited prior art differ from the claimed invention in that it does not describe that the step of transmitting the network address of the first charging system from the first data network to said second data network is performed before the step of registering the terminal device to the second data network.

Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-38 is novel and is considered to involve an inventive step. The invention is industrially applicable.
